## New Furutech FI-UK (S) silver-plated power connector

**We asked for it, we got it. Furutech's top-of-range UK power connector is now available in a new silver-plated version.**

The FI-UK is Furutech's top-of-range, high-performance power connector, constructed specifically for the UK mains power supply. To date, it has been offered in two versions, 'R' and 'G', denoting rhodium or 24k gold plating of the hybrid copper conductors. *How about a silver-plated version too?* asked UK customers. *Absolutely*, said Furutech.

FI-UK (S) power connector features / specifications:

- Type: 2-pole + earth
- Rating: 13A fused/250V AC
- Silver-plated, Alpha-treated Eutectic copper alloy conductors
- Body material: Fireproof ABS body/housing
- Accommodates cable diameters of 6-20mm with large, high quality cable clamps / grips.

The FI-UK's conductors are treated with Furutech's trademark two-stage 'Alpha' cryogenic and demagnetization process, designed to render all metals stress-free, stable and highly electrically conductive – and enabling that all-important Furutech goal of "pure transmission".

### **Pricing & availability**

Furutech's FI-UK (S) UK mains connector is available now priced at £100 (including VAT).
